DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 25, 2006 has been entered.

Election/Restrictions

Applicants' election of the invention of Group II (claims 15-18) with traverse is acknowledged.

The traversal is on the grounds that Applicants' specification calls for the orthopedic reamer of claim 15 to employ a single bending operation for bending each cutting tooth. This is not found to be persuasive because the orthopedic reamer of claim 15 can be made by a process not having a single bending step. It is further noted that, "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on the method of its production. If the product in the product-by-process claim is the same as or obvious from the product of the prior art, the claim is unpatentable even though the prior product was made by a different process." *In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985)*.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3733

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Grace et al. (US 5,302,234).

Grace et al. disclose an orthopedic reamer including a shell having a convex and a concave side and a plurality of teeth, wherein each tooth has a cutting edge extending from a cutting face and a pair of relief cuts extending transverse from opposite ends of the cutting edge wherein the cutting edge of each tooth is bent inward (Figs. 7 and 9 and col. 7, lines 39-46).

Response to Arguments

Applicant's arguments submitted under "REMARKS" in the response filed on May 25, 2006, with respect to claims 15-18, have been considered but are most in view of the new ground of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anu Ramana whose telephone number is (571) 272-4718. The examiner can normally be reached Monday through Friday between 8:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached at (571) 272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
